

Sahil Bansal

DevOps Engineer | Platform Engineer

+91 8949823046 | connect@sahilbansal.net | linkedin.com/in/sahilbansal24 | github.com/sahilbnsll | www.sahilbansal.net

Professional Summary

DevOps / Platform Engineer with 3+ years of experience building and operating AWS infrastructure, Kubernetes platforms, and CI/CD systems for SaaS environments. Delivered \$40K+ annual cloud savings, 60% faster deployments, and reusable Terraform platform capabilities across multiple engineering teams. Experienced in AWS, EKS, ECS, Terraform, GitOps, observability, IAM, incident response, and production reliability.

Technical Skills

Cloud: AWS (EKS, ECS, EC2, Lambda, IAM, VPC, RDS, S3, CloudWatch)

Kubernetes: Kubernetes, Amazon EKS, Helm, ArgoCD, Karpenter, Cluster Autoscaler

Infrastructure: Terraform, GitOps, Infrastructure Automation

CI/CD: GitHub Actions, Jenkins, AWS CodeBuild

Observability: Prometheus, Grafana, CloudWatch, Alerting, SLOs, Incident Response, RCA

Security: IAM, IAM Identity Center, RBAC, Trivy, DevSecOps, Least Privilege

Programming: Python, Bash, SQL, YAML, HCL

Databases: PostgreSQL, MySQL, MongoDB, ClickHouse

Data Engineering: Dagster, DBT, DLT

Networking: TCP/IP, DNS, Route53, Load Balancing, VPC

Operating Systems: Linux

Professional Experience

Buyogo AG

Jun 2024 – June 2026

DevOps Engineer

Zurich, Switzerland (Remote)

- **Reduced AWS infrastructure spend by 40% (\$40K+ annually)** across 20+ production services through Fargate Spot adoption, Savings Plans optimization, workload rightsizing, and FinOps governance.
- **Reduced infrastructure provisioning time by 70%** across four AWS environments by building reusable Terraform modules for ECS, EKS, IAM, RDS, SQS, networking, and shared services.
- **Reduced deployment duration from 15 minutes to 6 minutes** across 20+ repositories by implementing GitHub Actions, ArgoCD, and Helm-based GitOps workflows.
- **Operated workloads on Amazon EKS** using Helm, ArgoCD, Karpenter, and Cluster Autoscaler, improving workload scheduling, deployment consistency, and cluster resource efficiency.
- **Maintained 99.99% platform availability** for multi-tenant SaaS workloads serving 100+ suppliers and processing 1,000+ daily ingestion requests through HA infrastructure, observability, and incident response practices.
- **Led production incident response and RCA** across AWS and Kubernetes workloads, using Prometheus, Grafana, and CloudWatch to improve detection, troubleshooting, and operational visibility.
- **Implemented AWS IAM Identity Center (SSO)** and least-privilege access controls, eliminating long-lived credentials and improving organizational security posture

Capgemini

Jan 2024 – Jun 2024

DevOps Analyst

Pune, India

- **Improved deployment success rate by 15%** by decomposing monolithic CI/CD pipelines into modular independently deployable stages
- **Reduced incident response time by 20%** through Prometheus alerting integration and automated Slack-based operational workflows

Qapita Fintech

Jun 2023 – Nov 2023

Software Engineer – DevOps

Hyderabad, India

- **Prevented 95% of critical container vulnerabilities** from reaching production by implementing Trivy-based security gates in AWS CodeBuild pipelines
- **Improved centralized logging performance by 30%** and reduced storage costs by 45% through migration to scalable AWS EFS infrastructure

Projects

- **LumaCV** — Built an open-source resume engineering platform with Next.js, Typst, Supabase, and multi-provider LLM APIs, featuring sub-50ms deterministic PDF compilation, BYOK privacy, AI tailoring, and transparent audit trails.
- **Terraform Platform Modules** — Built reusable Terraform modules for ECS, IAM, SQS, RDS, VPC, and shared infrastructure, enabling standardized deployments across multiple AWS environments and reducing provisioning effort by 70%.
- **Data Platform Engineering** — Built orchestration and analytics pipelines using Dagster, DLT, DBT, and ClickHouse to support large-scale ingestion workloads and near-real-time operational reporting.

Education

University of Petroleum and Energy Studies

2019 – 2023

B.Tech in Computer Science and Engineering (DevOps & Cloud Specialization)

CGPA: 7.86/10
